

'Towards a revised Neogene stratigraphy of Belgium'
19 - 20 May 2022

Online registration OPEN until 3 May 2022:
[National Commission for Stratigraphy of Belgium](#)

National Commission for Stratigraphy of Belgium
Subcommission for Paleogene and Neogene Stratigraphy

Photo Everaert S.

In 2020 the stratigraphic subcommission published [a review of the current status of the Neogene of northern Belgium in Geologica Belgica](#). Thereby new insights arose and new paths for further research were defined. The review is furthermore the starting point for a new formal stratigraphy of the Belgian Miocene and Pliocene which will be published on the website of the National Commission for Stratigraphy of Belgium.

The results of the stratigraphical review will be presented during a one-day seminar. Special attention will be given to the cross-border integration and the correlation of the Miocene and Pliocene deposits.

▪ **19 May 2022 Symposium**

Royal Belgian Institute of Natural Sciences, Vautierstraat 29, 1000 Brussels

▪ **20 May 2022 Excursion**

Start: Geotheek, Gustaaf Levisstraat 45, 1800 Vilvoorde

- **Open, free event. Registration mandatory**
- **Welcome to professional geologists, paleontologists, citizen scientists and professionals with interest in Neogene stratigraphy**

Thursday 19 May – [detailed program](#)

Morning: Keynote by Dirk Munsterman (TNO, The Netherlands)

Session 1, 2: Upper Oligocene to Pliocene stratigraphy

Oral presentations

Sandwich lunch

Afternoon: Keynote by Martin Salamon (Geologischer Dienst NRW, Krefeld, Germany)

Session 3: Neogene mineralogy, paleontology and data strategy

Session 4: The future of the Neogene stratigraphy

Oral presentations - Discussion

Friday 20 May

One-day excursion in the Neogene of northern Belgium

[detailed program](#)

Further details of the program and online subscription available on the website of the [National Commission for Stratigraphy of Belgium](#).
